

When I went to renew my pass at Universal, I asked if there was a way to see how many times I swiped my pass to enter the parks in the previous year (2015 season). The Team Member said it was very easy to check and gave me the number: 46. 46 visits. Even I was surprised by this number, but I really doubt their barometric scanners lie. Needless to say, I am very familiar with both of these theme parks. I have been to the park in every month of the year, in almost every weather

circumstance, and in (most importantly) a whole variety of crowd sizes. Am I going to try to predict wait times for your visit? No, absolutely not. What I am going to attempt to do is improve your efficiency as a visitor of this park. I want you to feel comfortable saying “We can come back to this later because the line will die down” or “Wow, now is the time to hit this ride.” If you can feel comfortable doing that, I will feel as though this guide has improved your vacation.
